

I always get a "DNS error (80410410)" message on my PSP when I go to "Test connection" or when I try to connect to the Internet:

The **DNS 80410410 error** message may appear in certain cases on your PSP when you try to establish a connection to the Internet.

To resolve this problem, you must manually enter the **DNS (Domain Name System)** settings for your Internet service provider on your PSP, as follows:

1. Open the **Network Settings** menu on your PSP.
2. Select **Infrastructure Mode**.
3. Select the connection that you have already created for the **FunAccess** and then press the **Triangle (Options)** button on your PSP console.
4. Select **Change**, and then validate.
5. Press the right button on your PSP console **4 times** to skip the first steps, until you get to **Address Settings**.
6. Select **Custom** and continue.
7. In the **IP Address Setting** window, select the **Manual** option and fill in all of the following fields:
 - **IP address:** enter an IP address between 192.168.0.2 and 192.168.0.254 (example: 192.168.0.15).
 - **Subnet Mask:** 255.255.255.0
 - **Default Router:** 192.168.0.1 (this is the FunAccess key's IP address).
 - **Primary DNS and Secondary DNS:** These settings depend on your Internet service provider. Contact your ISP for information on the settings to use or try the following settings:

United Kingdom:

- **AOL:**
Primary DNS: 205.188.146.145
- **BT Yahoo:**
Primary DNS: 194.72.6.57
Secondary DNS: 194.73.82.242
- **BT Broadband:**

Secondary DNS Server: 212.166.64.2
- **Orange/Wanadoo:**
Primary DNS: 62.37.225.56
Secondary DNS Server: 62.37.225.57
- **Ya.com:**
Primary DNS: 62.151.2.8
Secondary DNS Server: 62.151.8.100

These **DNS** coordinates may be modified by your ISP. If the settings listed above do not function properly, please verify them with your ISP.

8. Continue to the **Proxy Server** screen and keep the **Do Not Use** option.
9. In the **Internet Browser** screen, keep the **Do Not Start** option.

You can then verify the **Setting List** displayed on your PSP's screen, **Save** and **Test Connection**.
