

HOW TO LOAD THE TARGET PROFILE FOR STAR CITIZEN...

First, if not done already, install T.A.R.G.E.T, then reboot your computer.

Once done :

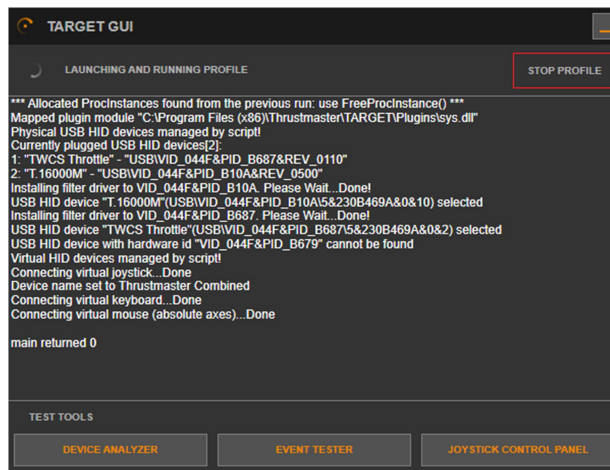

1. Copy the file « **layout_TARGET_FCS_DUO_exported.xml** » into your game folder :
« *StarCitizen\Public\USER\Controls\Mappings* »
2. Plug your T.16000M FCS DUO and TFRP (TFRP is optionnal)
3. Launch « TARGET GUI » (desktop icon, start menu or go to : "*C:\Program Files (x86)\Thrustmaster\TARGET\x64\TARGETGUI.exe*")
4. Clic on the « Run configuration » button located in the top right corner of the interface.

5. Browse to the profile you want to load, in our case, « **T16000M Duo Star Citizen.fcf** » and double-clc it, it will then run the profile.

Note : *running a profile for the first time can take some time.*

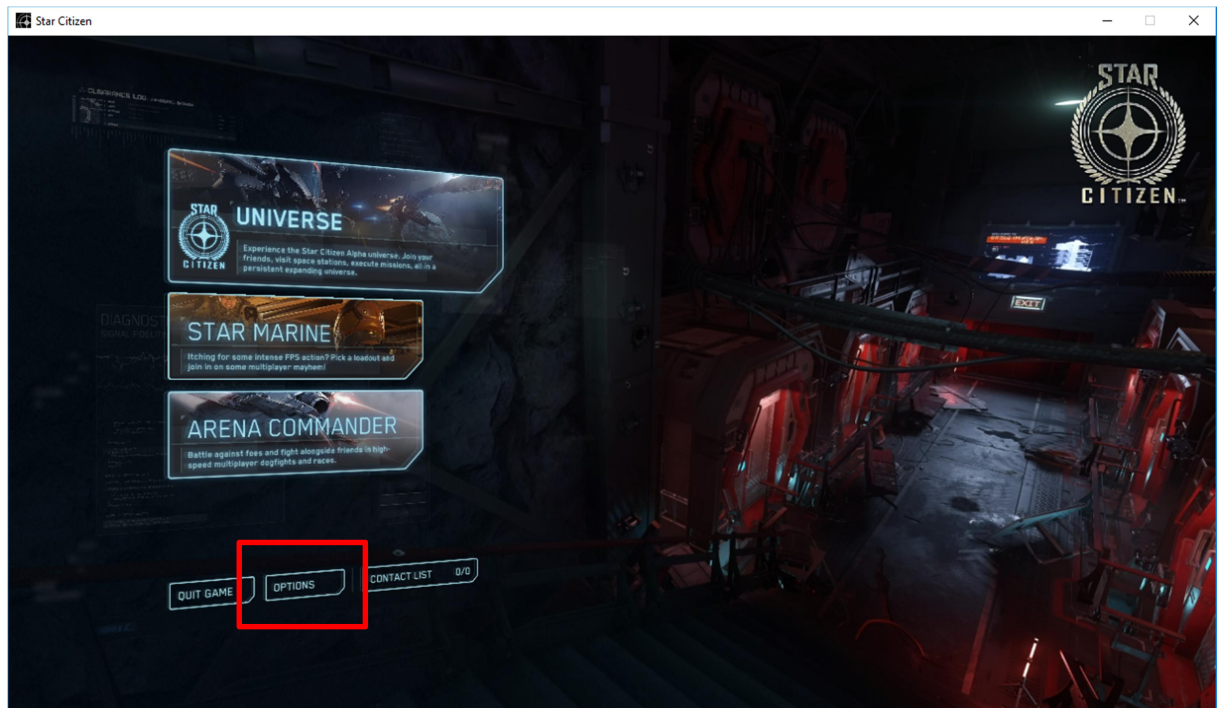

6. Once you see this, you can launch « Star Citizen » software, **but do not stop the profile or exit T.A.R.G.E.T.**

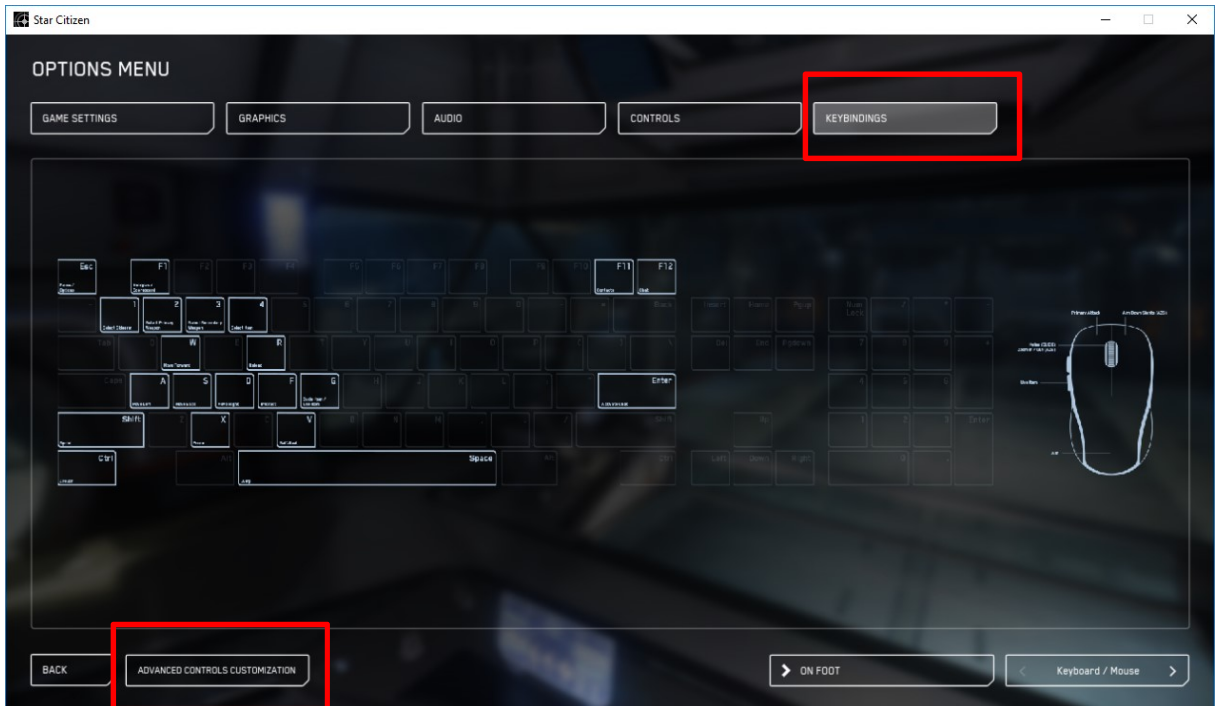

Note : Once you stop playing and after exiting « Star Citizen », you can click on the « stop profile » button and exit T.A.R.G.E.T.

The following steps are to be done only the first time or after reinstalling the game. If you already performed them, you are good to go

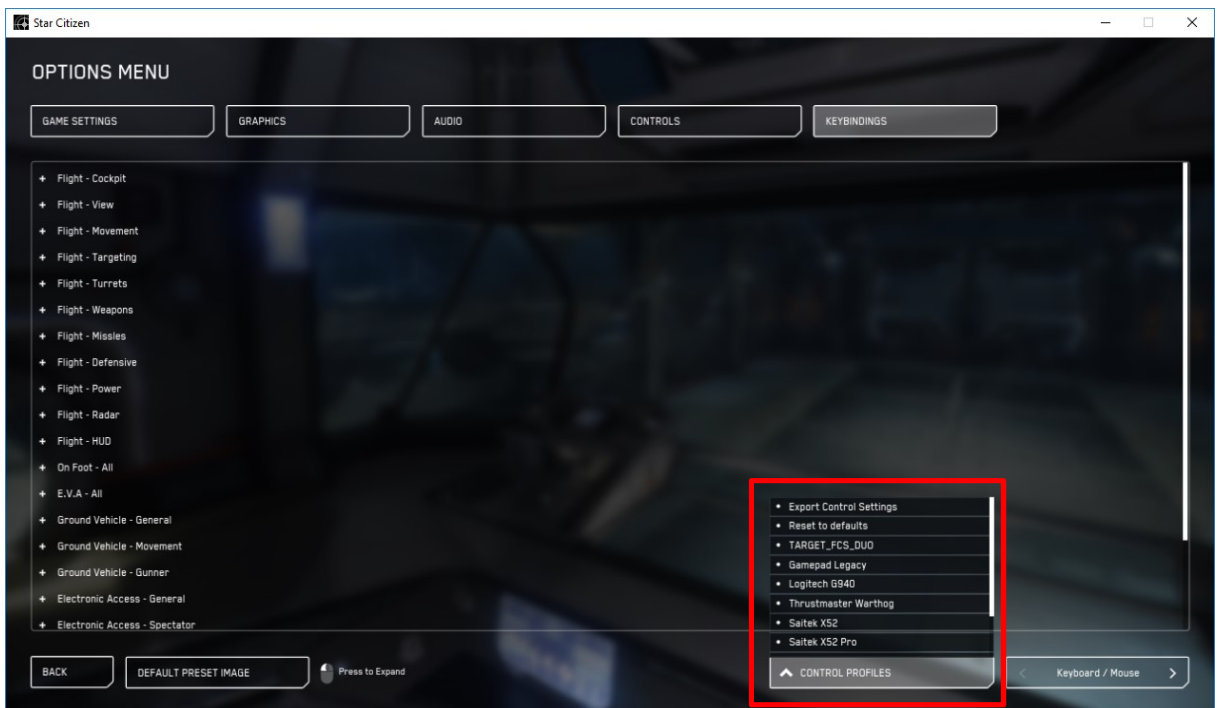

7. In the main screen, select « options » :

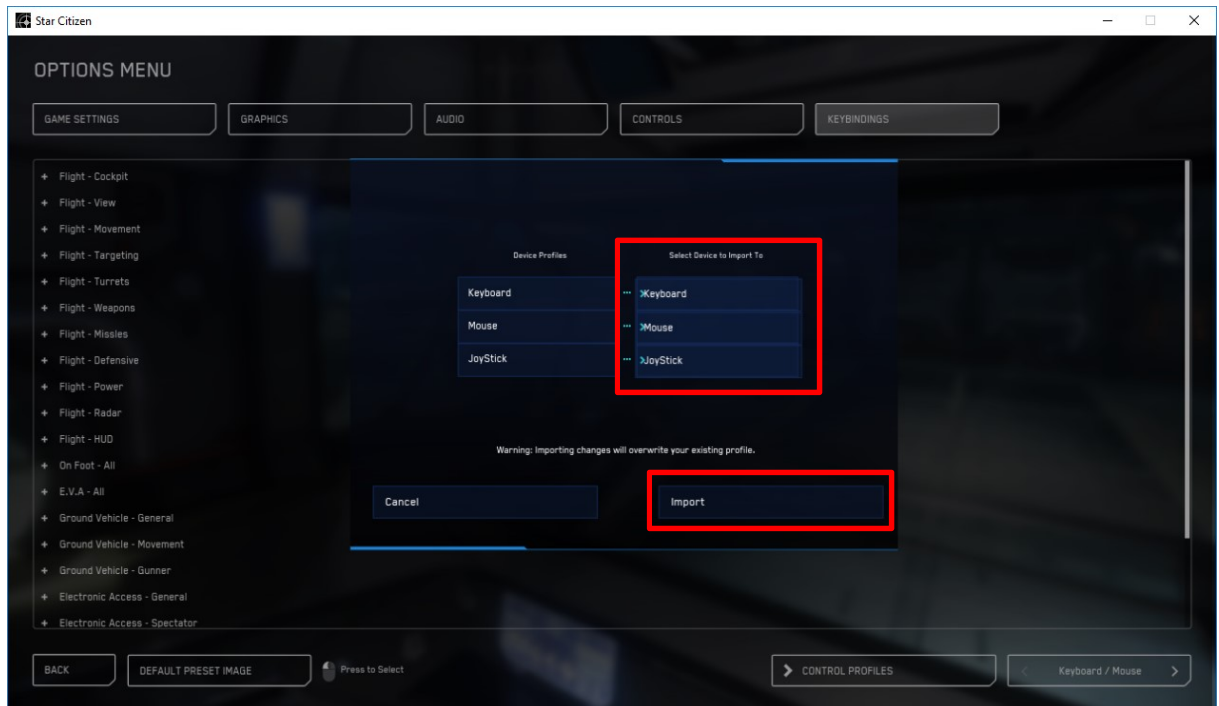

8. Select « Keybindings » then « Advanced Control Customization »

9. In the « Control Profiles » drop list, select « TARGET_FCS_DUO » :

10. In this screen, match each device in the left and right column and click « IMPORT »

You are all set to discover the galaxy. Good luck pilot !
