

Thrustmaster "Ferrari F1 wheel" "GRAN TURISMO®" – Mapping

To use the 2 rotary encoders in GT5 and be able to configure your car directly in race:

- 1) Go to "Options/Steering Controllers/THRUSTMASTER® T500 RS n°1/THRUSTMASTER® T300 RS n°1"
- 2) Configure the wheel as follows:
 - * **Cross = (RA function) Menu**
 - * **D-Pad Up = (RA function) Adjust +**
 - * **D-Pad Down = (RA function) Adjust -**
 - * **D-Pad Left = (RA function) Select +**
 - * **D-Pad Right = (RA function) Select -**

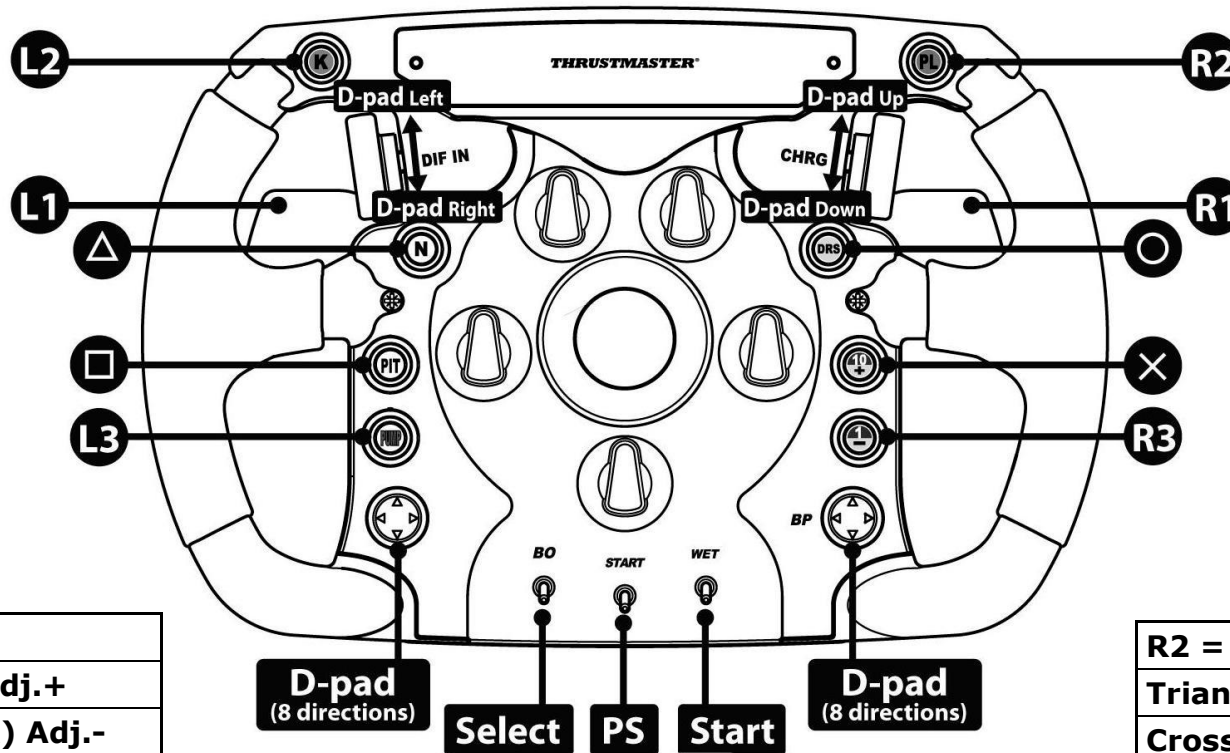

- 3) Click on "OK"

You are now ready to race!
(in race just press "Cross" button to activate/deactivate RA function)
