

Firmware Update Procedure – TCA Quadrant Airbus Edition

- 1- Ensure the device is not plugged
- 2- INSTALL THE LATEST DRIVER PACKAGE AVAILABLE AT THIS LINK:
<https://support.thrustmaster.com/tca-quadrant-airbus-edition>
 - download the package

The screenshot shows the Thrustmaster Technical Support website. The navigation bar includes 'Racing Wheels', 'Joysticks', 'Gamepads', and 'Gaming Headsets'. The 'Joysticks' category is selected, and the 'TCA Quadrant Airbus Edition' product page is displayed. A red box highlights the 'Drivers' section, specifically the link for 'Drivers - Package 2020_TFHT_3 + Firmware'. A red arrow points to this link with the text 'Click here'.

- go into the destination folder and double-click on the file

- follow the installer steps

The screenshots show the following steps of the installer wizard:

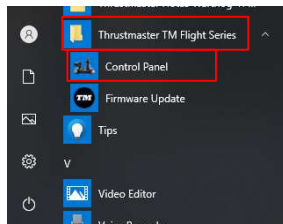

1. Welcome screen: 'TM Flight Series v.1.TFHT.2020'. The 'Next >' button is highlighted.
2. License Agreement: 'Please read the following license agreement carefully.' The 'I accept the terms of the license agreement' radio button is selected. The 'Next >' button is highlighted.
3. Choose Destination Location: 'Select folder where setup will install files.' The default path is 'C:\Program Files\Thrustmaster\TM Flight Series'. The 'Next >' button is highlighted.
4. Ready to Install the Program: 'The wizard is ready to begin installation.' The 'Install' button is highlighted.
5. Progress bar: 'Please wait...' with a green progress bar. A red box with the text 'Wait for This step to complete' is overlaid on this screen.
6. Finish: 'Please connect all of the Thrustmaster products you want to install.' The 'Finish' button is highlighted.

- let the computer reboot

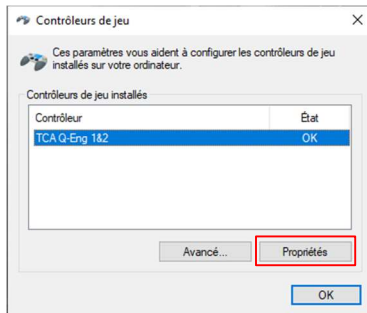

ENSURE YOUR TCA QUADRANT IS PLUGGED TO YOUR COMPUTER

3- CHECK THE FW VERSION IN THE CONTROL PANEL

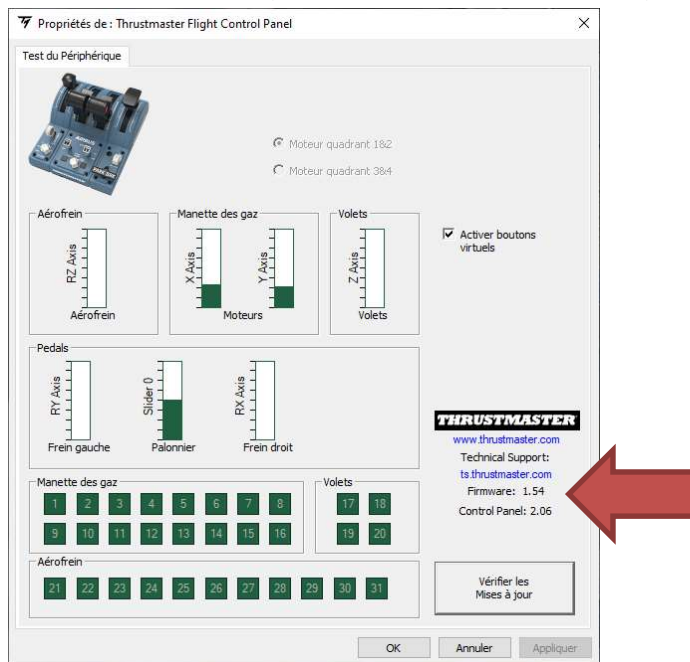

a. In « start menu » => « thrustmaster » => « control panel »

b. Check that your device is present then press « properties »

c. Check the FW version (as of 2020/10/22, latest is 1.56)

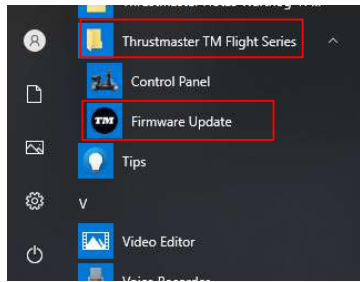

(for example this product needs updating)

Firmware Update Procedure – TCA Quadrant Airbus Edition

4- UPDATE THE FIRMWARE TO 1.56

a. In « start menu » => « Thrustmaster » => « FW Updater »

b. Check that your device is detected then press « OK »

c. Wait for the updater to complete step

d. Once step 2 is complete, you will be prompted to unplug then plug the device back in

e. Your Firmware is now updated (click the cross at the top right corner to close).
