

Thrustmaster™ “RGT PRO FFB” Thrustmaster™ “RGT PRO CLUTCH FFB”

“COLIN McRae Dirt™ - PC”

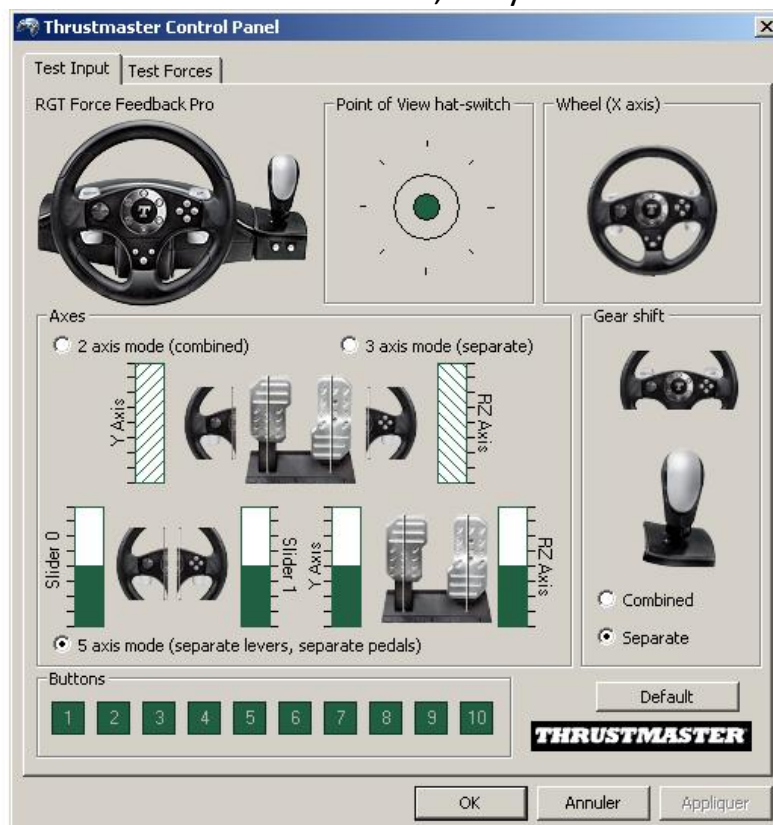

Step 1

Download the upgrade Patch “Version 1.1” here:

<http://www.codemasters.co.uk/downloads/?downloadid=28894>

Step 2

In the “Thrustmaster Control Panel”, set your wheel to “5 axis mode”

Step 3

- Launch the game
- Access "OPTIONS \ CONTROL SETUP" page
- You will find "PRESET 1 – RGT Force Feedback Pro"

This preset is not perfect because with this preset "Accelerate and Brake" are on "Progressive Levers" and not on "2 pedals"

Step 4

To change this mapping access the “CUSTOMISE” page and configure “Accelerate and Brake” on the 2 pedals and “Handbrake” on “Third pedals” or on “one Progressive Levers”

(on this picture, “Handbrake” is on “Right Progressive Lever”)

Step 5

- Highlight the “CUSTOMISE” word
(must be red as shown on the picture up)
and press “ENTER” twice to save your configuration
- The game will display “SAVING PROFILE” on the bottom of the screen
and will then return to the “OPTION MENU” Page

Saving Profile

Saving content. Please do not turn off your PC.

Step 6

- Press “ESCAPE” to return to the “MAIN MENU” page

READY TO PLAY!!!

REMARKS

In the menu “CONTROL SETUP”, you can also configure:

- the “Force Feedback”
- the “DeadZone, Linearity and Saturation” of the wheel
 - the “DeadZone and Saturation” of pedals
